## PROJECTS

### [Zeost](#)

- Zeost is a web-based project developed as part of my virtual internship, aimed at applying practical frontend development skills in a real-world scenario.
- Learned professional workflows (version control, build tools, deployment)
- Collaborated with mentors and followed internship requirements

### [Yum Maker](#)

- Designed and developed a fully responsive restaurant landing page using HTML and CSS. Focused on clean UI/UX, structured layout, and mobile compatibility. Deployed the project live using Netlify and managed version control with Git and GitHub.
- Gained hands-on experience with layout design, semantic HTML5, and CSS3 styling practices for real-world websites.
